

Presentations

Kosciuszko Symposium 11th-12th December

Presenter	Title
Worboys, Dr Graeme L	Plenary Address: Caring for Kosciuszko.
Vernon, Jorja et al	A ~3000 year record of palaeo-environmental change and human disturbance in Kosciuszko National Park.
Percival, Ian G	Overview of the geology of the Snowy Mountains Region of southern New South Wales.
Woodward, Craig et al	Towards a comprehensive record of Quaternary environmental change from the Snowy Mountains, Australia.
Stromsoe, Nicola	Dust contribution to soil development in the Snowy Mountains.
McCartney, Victoria (Ewen Silvester)	Bryophyte pools on the Bogong High Plains – threatened groundwater ecosystems.
Spate, Andy	What is the significance of the karsts of Kosciuszko National Park?
Rutledge, Jodie	Reassessment of the age of the Yarrangobilly limestone.
Venn, Susanna	Alpine shrubs as ecosystem engineers.
Pickering, Catherine	Conservation of the highest and potentially rarest grass in Australia: The Feldmark grass, <i>Rytidosperma pumilum</i> .
Briggs, Barbara	Habitat disturbance and the breakdown of ecologically maintained species: <i>Ranunculus</i> revisited.
Geange, Sonya	<i>Aciphylla glacialis</i> mortality, growth and frost resistance: A field warming experiment
Barnes, David	Historic photographs from the Snowy Mountains Region of southern New South Wales
Wright, Genevieve	Archiving the scientific legacy of Alec Costin
Szmalko, Lauren	Seed dispersal in the Australian Alps.
Pearce, Emma	Dendroclimatological analysis of <i>Podocarpus lawrencei</i> reveals the impact of recent temperature and snow trends in the Australian Alps.
Gibson, Casey	Snow, frost and movement: assessing the future of Australia's alpine flora under climate change.
Naccarella, Aviya	The response of alpine and subalpine treelines to climate change and disturbance in the Falls Creek and Hotham region, Victoria.
Nicotra, Adrienne	Expert elicitation: Predicting adaptive capacity in Australian mountain plant communities.
McDougall, Keith	Plant pests and pathogens of Kosciuszko National Park.
Umbers, Kate	The startle display of the mountain katydid.
Atkins, Zak	Allopatric divergence drives the genetic structuring of endangered alpine endemic lizard, <i>Liopholis guthega</i> .
Bates, Hayley	Back to the future: how an understanding of the past can help strengthen the future conservation efforts of the Mountain Pygmy-possum (<i>Burramys parvus</i>).
Green, Ken	Locomotion and foraging adaptations of large marsupials to survival in winter snow cover.
Schroder, Mellea	Establishing a balance between threatened species management and recreational use – Kosciuszko National Park.
Broome, Linda	Feral cats in alpine areas of Kosciuszko National Park: Quantifying distribution and threat to native fauna.

Presentations
Kosciuszko Symposium 11th-12th December

Presenter	Title
Mooney, Scott	Twentieth century changes in the fire regimes of high altitude ecosystems in eastern Australia: Evidence from long, multi-proxy records.
Marx, Samuel	A record of landscape and industrial change reconstructed from peat mires in the Snowy Mountains.
Keith, David	Long term dynamics in alpine Sphagnum bogs: responses to livestock grazing, fire and cover.
Hope Geoffrey	Horses, Cows and Snowy Mountains peat Swamps
